GenEng | Mean Stack Specialist | Node.js Developer | DevOps | Open AI Developer

EDUCATION

VIRTUAL UNIVERSITY OF PAKISTAN 2012- 2026 (CGPA: 3.0)

SKILLS

Programming Languages: TypeScript, JavaScript Es6+

Development: MEAN/MSAN Stack (MongoDB, Express.js/Nest.js, Angular, Node.js), JavaScript, TypeScript, Angular 2+, Bootstrap, HTML5, CSS3, Node.js, Nest.js, Express.js, Mongoose ODM, WebSockets (Socket.io), JWT, OAuth, Passport.js, RESTful & GraphQL APIs, MongoDB, MongoAtlas, MySQL, PostgreSQL, OpenAI, Google Gemini, AI Agent Development, Prompt Engineering, Git, GitHub, VSCode, Angular CLI, NPM, Postman, Swagger
DevOps: AWS, Google Cloud (GCP), Microsoft Azure, DigitalOcean, Heroku, Vercel, Netlify, Ubuntu, Docker, Kubernetes, GitHub Actions, Terraform, Vault, NGINX Server, Shell Scripting, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Software Development Team Lead || YouMakr.ai · Full-time **Feb 2023 - Present**

As a seasoned Software Development Team Lead, I drive AI-powered and MEAN-stack application development, focusing on scalability, innovation, and performance. I lead agile feature rollouts, manage cloud deployments, implement AI-driven automation, collaborate cross-functionally, and align technical vision with business goals and growth strategies.

Senior Software Engineer || JiBe ERP · Full-time **Jan 2022 - Jan 2023**

As a Senior Software Engineer at JiBe ERP, I developed and optimized AI-driven maritime ERP solutions, leveraging MEAN-stack technologies to create scalable, OCR-based document processing workflows, interactive Angular interfaces, efficient vessel management modules, and Azure-integrated DevOps practices, enhancing maritime operational efficiency and data accessibility.

MediaCowBoys || Full-time **Jan 2017 – Jun 2021**

Tech Lead Manager – CRM Development (Full-Time, Apr 2021 – Jun 2021)

- Led development and scaling of Humanoid CRM (MEAN stack), enhancing customer interactions through robust CRM modules, agile sprint rollouts, AI-driven automation, and advanced security practices.
- Collaborated closely with stakeholders and CTO for strategic alignment and feature prioritization.

Tech Lead Manager – Magnus Recruitment Platform (Part-Time, Sep 2021 – Feb 2022)

- Built a scalable recruitment application leveraging Angular 16+, Node.js, Nest.js, MongoDB, AWS deployment, secure authentication, and responsive UI/UX from Figma designs.
- Developed candidate portals, college dashboards, secure document management, timesheet management, and robust admin features.

Full Stack Developer – Global Age LMS (Part-Time, May 2021 – Jun 2021)

- Developed MEAN stack LMS with interactive MCQ-based student portals and admin dashboards for exam management, performance analytics, secure authentication, and subscription handling.
- Managed deployments on AWS and ensured secure data handling and performance optimization.

MEAN Stack Developer & eCommerce Specialist (Full-Time, Jan 2020 – Feb 2021)

- Developed eCommerce solutions using MEAN stack, WordPress, WooCommerce, and Shopify, optimizing user experiences, performance, and third-party integrations.
- Improved site performance, SEO, payment integrations, and streamlined store operations.

E-commerce Specialist – The Palm Clothing (Full-Time, Oct 2020 – Dec 2020)

- Built and optimized an eCommerce store using WordPress/WooCommerce with Elementor, performance enhancements, interactive UI/UX elements, secure transactions, and database management.

Website Developer – Planet Payroll & Purple Payroll Solutions (Full-Time & Self-employed, Jun 2020 – Sep 2020)

- Developed dynamic payroll management platforms using WordPress, PHP, MySQL, and JavaScript (jQuery), ensuring responsive designs, database optimization, and performance enhancements.
- Implemented security standards, HTTPS, and CDN integrations for reliable site performance.

Frontend Web Developer (Freelance, Jan 2017 – Jan 2020)

- Created responsive landing pages using HTML5, CSS3, Angular, Bootstrap, and integrated APIs for dynamic data.
- Managed version control (Git/GitHub) and optimized deployments using Vercel for fast and reliable hosting.

Upwork || Self-Employed **Jan 2020 – Jul 2020**

As a freelance consultant, I delivered secure, scalable MEAN-stack solutions for eCommerce, custom web apps, CRM, ERP, and AI-driven projects, optimized RESTful APIs, handled UI/UX design, third-party integrations, cloud deployments, and managed projects using Git, GitHub, Slack, and Trello.

Facebook Marketing Manager || Full Time **Nov 2016 – Nov 2017**

Managed Facebook pages and executed targeted ad campaigns via Meta Business Manager. Optimized ads for audience engagement and conversions, analyzed performance metrics to enhance ROI, and collaborated on content strategies, effectively increasing online presence, driving user engagement, and supporting business growth.
